Answer ALL questions. Calculators may be used.

1. What is the SI unit of force?
   A. Newton
   B. Joule
   C. Watt
   D. Pascal

2. A car accelerates uniformly from rest. Use the table to find its acceleration. [4 marks]
   Time (s) | Speed (m/s)
   0 | 0
   5 | 20

3. Figure 1 shows a block of mass 2 kg on a rough slope inclined at 30 degrees.
   Which option correctly describes the friction on the block?

A. Friction acts up the slope
B. Friction acts down the slope
C. There is no friction

4. Explain Newton's first law of motion. [5 marks]

5. State two examples of a vector quantity and two examples of a scalar quantity.
